

Argus Software Customer Configuration

This form is used to gather licensing information for new users of Varian's Argus software. Please fill in the fields on the following pages to exactly match the Argus purchase that you made, including number & type of machines and number of interfaces.

After filling in all information, fax all appropriate pages to the number listed below. The information will be transmitted to Varian, so that your clinical Argus data file will be customized with this information. This data file will be sent to your Argus installer within 1 week. Your installer or a project manager will contact you to schedule installation.

Note for existing Argus users: Do NOT use this form if you are an existing Argus user adding a new license to your data file. Please contact Varian's Help Desk at 888-VARIAN5 (702-938-4807 outside the US) to make changes to your Argus license.

Instructions

1. Locate your Varian quote or sales order, and determine exactly which Argus items you have purchased.
2. Fill in the appropriate sections in the following pages, according to your order.
3. If you have more items than will fit on a page, print a second copy of that page.
4. Fax the completed form to (650) 842-5192. You can use the fax cover page provided at the end of this document.

Helpful Tips

- ◆ Be sure to **include information for every item** included in your Argus purchase.
- ◆ **Include** partial information if you're not able to fill in all the details for a particular item.
Example: you have not yet received your interface equipment, so you don't know the serial number. First, try calling the manufacturer, who may be able to provide this information even before shipment. If you can't determine the serial number, enter the appropriate Manufacturer and Model, and enter "TBD" for the serial number.
- ◆ **Do not** add extra items that aren't included in your order.

Contact Information

- ◆ For information on your **Sales Order**, contact your local Varian sales representative.
- ◆ For information on your **Installation**, contact your local Varian Project Manager or your Regional Service Center.
- ◆ For help with this form, contact Varian's Help Desk at 888-VARIAN5 (702-938-4807 outside the US).
