BWII EEG

The BWII EEG has been designed to fit all of your needs and to help you get better results.

Endless Reading Stations

AT NEUROVIRTUAL WE ARE always looking for ways to help make your practice easier, this is why we offer unlimited reading stations at no extra cost*. The BWII can be used in an active network environment; therefore, you can read your EEG results from any computer you choose. You can read from the computer originally used for the test, your office, or even the comfort of your own home.

*Computer not included.

Automatic Report Generator

Choose the information you want on a report, enter it into the exam while recording or reading the file, and push a button. That is all you need to do to generate a report, it is easy, fast, and accurate. The report is generated with Microsoft Office so it can be exported in many formats (doc, pdf, txt, rft), e-mailed, and printed.

Portable or Stationary

In order to make your practice easier, the BWII has been designed to weigh 8 pounds and fit into a small briefcase, this allows it to be used as a stationary unit or a portable unit so that you can use one device in several locations. It can be connected to any laptop or desktop computer to better suit your needs.

Digital Analysis

For easier analysis of an EEG the BWII is equipped with FFT to generate histograms, spectrum analysis, and frequency maps. This feature is easy to use and will help you save time when reading an EEG.

Easy to Use

The BWII is the most intuitive EEG device in the market. Everything from setting up to performing an exam, to reading the exam is easy to do. Some of the features the BWII offers are:

- A. All necessary menus to record an EEG can be found on the screen.
- B. Montages, filters, sensitivity and speed of the page can be adjusted during recording or reading.
- C. Events can be added during recording or reading.
- D. Patient's data can be updated during recording or reading.
- E. One exam is one file for ease of transferring, copying, and e-mailing (HIPAA Compliant).
