BWII EEG Upgrade

Digital Analysis

Free of Charge

The BWII uses Fast Fourier Transform (FFT) to create instant digital analysis. It allows you to create frequency maps, histograms, and quick spectrum analysis. Digital analysis can be done with localization of ictal or interictal activity.

Digital Analysis

The BWII EEG has been designed to help you get the best results right away. The following features are automatically included:

Endless Reading Stations

Free of Charge

Unlimited reading software, at no extra cost, allows you to record an EEG on one computer and read it on as many computers as you wish at no additional cost*. The BWII EEG can be set up as a single station or an active network environment allowing you to read from your office, at home, or even another town!

*Computer not included.

Easy Report Generator

Free of Charge

If you are familiar with Microsoft Word, you know how to create a professional report. It is as easy as typing the information into the patient information field and clicking the report generator button. The information you want on the report can be typed into the patient information field while reading or recording the actual exam. Since the report is generated with Microsoft Word it can be exported in many formats for ease of transferring, printing, and saving.

The Right Stuff

The BWII is equipped with endless features - drop down preset events menu, the option to update patient data while recording, and much more - that make recording and reading an EEG fast and accurate.

Free Software Upgrades Unlimited

We are constantly seeking to perfect the BWII EEG and each upgrade integrates suggestions from our users, and in return we offer unlimited free software upgrades. Customers are encouraged to log in to our website and upgrade their systems at no cost!

Synchronized Video Now Available

Now you can add video to your EEG exams. By purchasing the synchronized video license you can simplify your reading process. No more assuming whether certain recorded activity is artifact or real.

Sleep Now Available

If you are in the market for a Sleep Product, simply upgrade your BWII EEG to the BWII PSG and save on software and staff training costs.

BWII PSG

Ambulatory By 2010

Since customer request has been strong for an ambulatory product our R&D will have it ready before 2010 and you will be able to upgrade your current BWII EEG.

*Available within two years.

Because what you think is valuable to us, you can always expect new features for your BWII.
